A special welcome to strangers.
W. N. BROWN,
Pastor.

METHODIST EPISCOPAL CHURCH.

The sermon topics for Sunday, March 4th are as follows: 11 a. m.—"The place of the Home, the Public School and the Church in the Training of the Child." Each of these is becoming more anxious to fulfill its function toward the child, and each needs the co-operation of the others. 7:30 p. m., "How is the Bible to be Taught?" A companion sermon to the one of last week on the Old Testament Problem. The Epworth League at 6:45 p. m. will be lead by Mrs. A. G. Moore.

BAPTIST CHURCH.
Preaching 11:00 a. m. and 7:30 p. m. by Rev. E. O. Otto, missionary of the Grande Ronde Baptist association.

Sunday, March 4.
Sunday School, 10:00 a. m.
B. Y. P. U. 6:30 p. m.

D. E. BAKER,
Pastor.

WANTED—Clean Cotton Rags at The Argus Office.

"We know there are no errors,
In the great eternal plan
And all things work together
For the final good of man.
And we know when our souls speed
eward,

In their grand eternal quest,
We shall say as we look back earthward,

Whatever is—is best."

Whereas, it has pleased our Heavenly Father to remove from our midst Esteemed Neighbor, A. W. Trow, therefore be it

Resolved, that the members of the Ontario Camp Modern Woodmen of America, feel they have lost a true neighbor and friend and wish to express their sympathy to the bereaved family, and be it further

Resolved, that the charter of our Camp be duly draped for a period of thirty days, and a copy of these resolutions be sent to the bereaved family, also duly spread on our minutes and be published in the local paper.

M. W. A. Committee.

Modest Blackmore.
That the author of "Lorna Doone" was one of the best fruit growers in England is brought out by Hildegard Hawthorne in an article on Blackmore which she contributes to St. Nicholas. Indeed, it was of his fruit that he loved most to talk, according to Miss Hawthorne. Of his writings or of himself at all it was very difficult to get him to say a word, for he was shy and modest to a high degree. If you tried to make him talk about his books he would always slip quickly away to something about pencils or nectarines or plums, or he would ask you to come out to see his garden and wander there happily, pruning shears in hand, pointing out his prize fruits and telling you just what must be done to bring each type to perfection.

The following gentlemen took advantage of the good roads and moved their belongings. J. F. Weaver from Ontario to his ranch vacated by Frank Weaver, who moved to Brogan. Oliver Bingaman moved his dairy to the T. H. Moore ranch west of Ontario and will be better able to serve the public than before. S. A. Sooley's are settled in the Leavitt property. Frank Hawkins returned from Big Bend Sunday evening where he had been helping V. V. Hickox come to the ranch he purchased recently.

Mrs. Sarah Callaway came Wednesday from Spokane for a few weeks visit with her sisters, Mrs. J. A. Witters and Mrs. C. E. Amidon after which she will go to Portland.

Mrs. Frank Hawkins is enjoying a visit with her mother, Mrs. M. Hickox who returned last week from the western part of the state.

Mrs. Wm. Wells and daughter, Miss Thendosia spent the week end at the P. F. Countryman home.

Miss Ula Gramse was visiting her aunt, Mrs. Frank Hawkins Saturday and Sunday.

A large delegation of Boulevard ranchers went to Vale Monday to attend the drainage ditch meeting. It was postponed until March 12th.

B. H. Kerr's and Mrs. Pitzer were guests at Will Snyder's Sunday.

Adam Rose and wife went to Indian Valley the first of the week where they will visit James Ware and family.

BOTTLES ARE VERY ANCIENT.

Nearly as Old as Man. They Were First
Made of Animal Skins.

Who made the first bottle has never been determined, but the necessity for some means of transporting liquids, of which water was undoubtedly the first

to be considered, must have existed from the beginning of the human race, and it is generally considered probable that the first receptacle for this purpose was made from the skin of an animal. This was removed with as little mutilation as possible, and all the unavoidable openings were carefully sewed up, leaving a single leg for filling or emptying, which was tied up with a cord.

These, we know, were used ages ago by many primitive peoples and have since been employed extensively in many parts of the world, and even today they may be seen in use in some oriental countries. It was this kind of bottle that was referred to in the Bible in the much quoted dictum relating to putting new wine into old bottles. The objection to this procedure was that the skin of an old bottle has become fully stretched and weakened by use, and if new wine was put into it the pressure of the gases generated by the continued fermentation of the wine would burst the bottle.

It is a generally accepted fact that glassmaking and glass bottles originated among the Egyptians, although at what date no one has presumed to state. Even in Egypt, however, the art of glassmaking in its early history appears to have been confined to certain localities and was not practiced at all widely.—Scientific American.

UNDERTAKING.

J. H. FARLEY—Funeral director and embalmer. Lady assistant. Phone 132-W. Ontario, Oregon.

TRANSFER.

TRANSFER, BAGGAGE AND EXPRESS

Meets all trains.

JOHN LANDINGHAM

Clever Device in Use in Cities and Towns in Hungary.

"One sees mail boxes in operation in Hungary, both in cities and small towns, that are the last word in efficiency, and they are certainly good to look at in their design," says F. H. Schlesinger. "It was fourteen years ago that I saw them, and they had then been in operation for many years and I have yet to see anything better in any part of the world."

"These letter boxes are such that one does not have to lift any part of them in order to drop the letter. There is a wide slot on both sides protected by brass flaps working on hinges, so that the letter drops down without any possibility of becoming stuck near the top in the lift, as in our boxes. Furthermore, the letter carrier does not touch any letter when he takes the mail out. He has a bag with a locked steel oblong automatic top, the key to which is in the postoffice."

"This top of the bag is slid into a slot at the bottom of the mail box, which opens automatically and can only be opened by the insertion of this specially prepared bag. By virtue of this the entire bottom of the mail box rolls back and its contents drop straight down into the bag. Upon removal of the bag by sliding it outward the bottom of the box slides back into place and locks automatically, as well as the bag with its automatic top."—New York World.

Strength of an Indian Beetle.
One day a native servant brought me a longicorn beetle which he was carrying by its feelers, while the beetle was carrying a stone weighing nearly half a pound.

But how the feelers could stand the strain the beetle was carried in this fashion for about forty yards and how the legs could retain their hold of a heavy stone which they could not encompass, I cannot conceive. The length of the beetle was two and one-fourth inches, its feelers three inches, and it weighed one-fourth ounce only, while the stone weighed seven and one-fourth ounces, measured three and one-fourth by two and one-half inches and was seven inches in circumference.—Serampore (Bengal) Letter.

Ford
The Universal Car

A new car in appearance, with large radiator and enclosed fan; streamline hood; crown fenders, front and rear; all black finish—a mighty handsome car—and yet the same reliable Ford simplicity, strength and economy. The ever-increasing demand for Ford cars is mainly due to the dependable, practical service given by the car in use, in every line of human activity, and the further fact that it is a pleasure car in the broadest sense. It is "work and play" combined in one car. It is a better car than ever before, and Ford Service is as universal as the car. Touring Car \$360 Runabout \$345 Coupelet \$505 Town Car \$595 Sedan \$645—f. o. b. Detroit. On display and sale at

Ford Garage

Ontario, Oregon.
